EMMA SOLUTIONS-1

Portable High Definition Audio Line Source Speaker System

- Compact, affordable powered line array performance
- Ballrooms, Halls, Churches, Clubs, Corporate A-V, Theatres
- Stackable 8 foot 3-way system sets up easily by two people
- *ETS* - EMMA Transport System fits in a minivan
- Includes straps, post, stabilizer bar & connector cables

A-Line Acoustics introduces **EMMA SOLUTIONS-1** a compact, affordable true line array system which can be quickly set up and operated by two people yet capable of covering large ballroom-size venues and theaters. Powered with **Bang & Olufsen ICEpower** the 2-way EMMA 806A speaker module with 8x6.5" LF - 8x6.5" ribbon drivers and matching EMMA S410A (4x10") subwoofer are an ideal audio solution for music and events where highly intelligible sound is required. The two four foot tall enclosures travel on the specially designed **EMMA Transport System (ETS)** With locking wheels, straps and storage for hardware and cables for easy move-in and out. Two eight-foot all columns set up in minutes to deliver crystal-clear high definition 3-way audio with 100 degree wide dispersion for mid to large size venues including clubs, banquet halls, theaters and houses of worship. EMMA systems feature consistent, even coverage by projecting high energy levels to the back while providing acceptable listening volume toward the front. **MADE IN USA**
